

Ugandan Green Coffee — Bulk Supply for Global Importers & Industrial Buyers

Reliable Ugandan Green Coffee for Large-Scale International Buyers

Uganda is an established coffee origin with both **Arabica and Robusta** available for international markets.

We are developing bulk supply programs for qualified global importers, coffee processors, roasters, soluble-coffee manufacturers, beverage companies, food manufacturers and commodity trading organizations requiring **15,000 MT/month or more**.

Bulk Supply Program

Origin: Uganda

Product: Green Coffee — Arabica & Robusta

Minimum volume: 15,000 MT/month

Buyer profile: Importers, processors, manufacturers, roasters and qualified commodity buyers

Supply: Recurring monthly programs

Contract: Long-term supply preferred

Destination: Global markets, subject to logistics and commercial qualification

Arabica and Robusta for Different Industrial Applications

Ugandan Arabica can serve specialty, premium, espresso and filter coffee markets, while Ugandan Robusta is particularly relevant for soluble coffee, extracts, commercial blends, concentrates and high-volume industrial applications.

The downstream opportunity extends from traditional coffee roasting to beverage, food, nutraceutical and other manufacturing applications.

What Industrial Buyers Need to Verify

For purchases at 15,000 MT/month and above, price is only one part of the procurement decision.

We focus on providing buyers with information covering:

- Origin and supply capacity
- Coffee variety and grade
- Quality specifications

- Quality-control procedures
- Traceability
- Documentation
- Aggregation and processing
- Export logistics
- Loading and shipment planning
- Monthly availability
- Commercial and contractual structure

Large-volume buyers need confidence that a supplier can support **consistent quality and recurring shipment programs**, not simply a single spot transaction. This follows the source strategy's emphasis on proving production, quality, traceability, logistics, documentation and commercial capability.

Are You Importing 15,000+ MT of Green Coffee Per Month?

We are opening discussions with qualified international buyers seeking scalable Ugandan coffee supply.

If your organization imports, processes or consumes green coffee at this scale, contact us with:

Company:

Country:
